

# Product Quick Info

**NEW**

**PROLINK**

**PXX 40/0 S7 HC B1 BK**

## Applications

- Worker belt classified according to "Building materials class B1" in compliance with DIN 4102

## Benefits

- Less surface pressure and so less wear and tear on the underside
- Conveyor heights lower (smaller end diameters) with closer modular pitch
- Decrease in chordal action due to closer modular pitch of 40 mm. Less abrasion on the teeth.
- Robust and resistant to abrasion due to 18 mm thickness.
- With high levels of effective pull and ideal teeth engagement particularly suitable for skid conveyors and track belt conveyors with high drive forces.

## Basic technical data

Material	PXX HC B1
Thickness	18 mm
Modular pitch [mm]	40
Surface	smooth
Colour*	black

\*The colour shown could be different from the modules available
